CYCLESIREN Siren & Lighting are lightweight, watertight and the LED lighting is high-visibility daylight viewing. The handlebar mounted tactile switch-box controls the siren sounds & lighting functions, including the optional taillight or side-lighting. Siren audio output power meets or exceeds the 115db level required for a bike patrol siren (115db SPL @ 3 feet). The User Programmable sound modes are (*Wail & Yelp*) or (*Hi-Low & Yelp*), *Phaser* and *Horn* or *Whistle*

CYCLESIREN is Custom Manufacture of Sirens & Lighting equipment for Public Safety. Our products constructed with pride in the **U S A**.

CYCLESIREN warranties our siren products for one year (excluding battery pack and battery charger, 90 day warranty).

[1] The 12-volt siren does not include a Battery or Charger, for pedestrian warning ONLY.
 [2] The 9.6-volt siren includes Battery & Charger, for pedestrian warning ONLY.
 [3] The Patrol white LED streetlight is designed for in-city use with the aid of city street lighting and should not be used for mountain biking or as the main lighting in very dark areas. The Patrol siren white light is designed the light the road in front of the by bike by 10 to 15 feet.
 [4] Replaces the standard 2200mAh battery and/or 600mAh standard charger.
 [5] The Patriot CAL (California) is the model recommended for Calif. Police Patrol (SOLID RED ON regulation).
 [6] Left & Right Side Lighting operates: Blue in code-3 mode only and Red in both non-code-3 & code-3 modes.
